Your Partner for

Microsoft Dynamics® Software-as-a-Service

Start your Software-as-a-Service strategy with Plumblines's SaaS

WHAT IS SaaS?

Software-as-a-Service (SaaS) seamlessly delivers software applications over the Internet as a service. This saves considerable time and resources that would otherwise be spent installing, hosting and maintaining the software in-house (the traditional on-premise model). This unique system benefits you, the implementation partner, by presenting a wide in-house choice of SaaS business software solutions for your clients, all delivered from one open Platform. The SaaS Platform is supported by superior levels of service, guaranteed scalability and availability, as well as optimal data security.

We leverage SaaSPlaza to deliver the cloud technology
